This list is an **excerpt from the H&S Production Regulation** and does not claim to be exhaustive. Both the H&S Production Order and, if applicable, further regulations, standards, laws, etc., must be observed.

[Link to the complete H&S Production Regulation](#)

**No** work may be started without **initial instruction/briefing** by the supervisor, responsible person, or occupational safety coordinator

In areas not designed for road traffic – this applies to the entire Olympic Park – vehicles must generally be driven at **walking speed** (maximum 9 km/h). If technically possible, the hazard warning lights must be switched on while driving.

Familiarize yourself with the **escape and rescue routes** as well as the **safety equipment** in your immediate work area.

**High-visibility vests** must be worn in areas where industrial trucks such as aerial work platforms, forklifts, wheel loaders are in operation, or where there is car or truck traffic.

In loading and unloading areas and during setup and dismantling work, **safety shoes** with toe and heel caps as well as puncture-resistant soles must be worn.

All **work equipment**, machines, tools, electrical equipment, ladders, steps, and industrial trucks/vehicles must be inspected according to legal regulations and must have appropriate marking. Defective equipment must not be used.

**Equipment** may only be used for its intended purpose and in accordance with occupational safety requirements by instructed and, if applicable, trained personnel.

You must respond appropriately to seasonal **weather conditions, such as heat**. This includes suitable clothing, rest breaks, and drinks.

For work involving a **risk of falling**, work at height, and on different levels, corresponding **instructions/briefings** and **qualifications** must be carried out or checked **in advance**.

When **working at height**, the **hazard area below** must be secured for third parties. This can be done by barriers or by having personnel in place.

When using **aerial work platforms, forklifts, golf carts, or bicycles** from the production fleet, proof of instruction/briefing and, if applicable, further certificates are required.

The **handover of electrical connections** as well as the **installation and operation of mobile electrical systems** is carried out exclusively by appropriately qualified personnel.

When using **mobile LPG consumption units**, such as for operating cooking devices, patio heaters, and heating devices, the relevant regulations and rules for commissioning, inspection, and fire protection must be observed.

**In the event of an accident or fire requiring immediate medical/firefighting assistance, the emergency number 112 must be called immediately.**

**Always observe: Avoid endangering yourself!**

Any accident or fire must be reported immediately to the occupational safety organization.

We are available for questions about occupational safety coordination by phone, email, or onsite.
